

# Northeast District Fire School

April 10, 2011

Hosted by the Roslyn VFD

## Classes:

**Wildland Fire "Burnout" Techniques** -- Gene Wolter and Mark Stoks, Aberdeen Rural Fire Department.

- This class will introduce you to the utilization of how to "use fire to fight fire" while at the scene of a wildland fire incident. Students must bring complete structural PPC and/or complete wildland PPC in order to participate in the hands-on portion of this class. (Note: weather and fuel moisture may be a deciding factor regarding whether the live fire training portion of this class may be conducted.)

**Grain Bin Entrapment and Rescue Techniques** -- Paul Schreck, GEAPS (Grain Elevator and Processing Society) Education Program Committee, FF/EMT - Mitchell Fire Division

- The average grain bin entrapment is nearly four hours. This class will review the hazards of flowing grain, survivability, how to access and free a victim, how to enter a grain bin safely, pre-planning at local grain facilities or farms, hands on evolution and demo of the rescue tubes and what if we don't have a rescue tube. This will involve basic ropes and knots. Refresh your skills prior to the session. Class size limited to 24 people.
- PPE - Eye Protection, hearing protection (foam ear plugs are fine), helmets or hard hats, extrication or leather gloves, coveralls, work jeans required – no loose or torn clothing – lace-up boots and dust masks recommended.

## Schedule
